

U4A1

Performance Outcome

Candidates synthesize the pros and cons of globalization and the reasons some groups consider it dangerous and others see it as a great solution

Scope

- Read assigned articles and respond to questions
- Create sharable notes on the platform of your choice
- Create a presentation for stakeholders of the school identified in U3A3 in which you address some of the concerns and questions a regarding implantation of an international curriculum

Deliverables

- Shared notes in which you respond to question prompts (you can organize this as you wish)
- **Presentation for school stakeholders**

Notes

- U3A3 required a formal letter recommending a curriculum. This activity requires a presentation that would be given in public to respond to concerns regarding that change.
- The reading Truth About IB is clearly biased. It was not chosen for its objectivity but rather as a representation of some of the strong views held.
- Other readings are also subjective and open to debate.
