

U2A3 – Intercultural Understanding

Performance Outcome

Candidates design an action plan for developing cultural awareness and understanding and create a content-specific lesson plan that reinforces the principles of the action plan

Scope

- Review resources and prepare shared notes
- A table with a list of behaviors you want to encourage juxtaposed to other behaviors that might be present as a reflection of other cultures and different orientations
- A plan for developing cultural awareness in your classroom and school
- A lesson plan that supports that larger plan

Deliverables

- Shared notes on sources
- Action plan (or report, infographic, etc.) for developing awareness and understanding of cultural differences
- Lesson plan that incorporates global competencies

Notes

- Note that your action plan requires at least 3 examples of steps for each group of stakeholders:
 - your students,
 - their parents/guardians,
 - yourself
- Your lesson plan can be more of an outline. It should have at least objectives and major elements, activities, and materials identified.
