

# U4A1 - Models of Cultural Intelligence

## Performance Outcome

Candidates analyze cultural intelligence (CI) and identify models that would be best for use in schools

# Scope

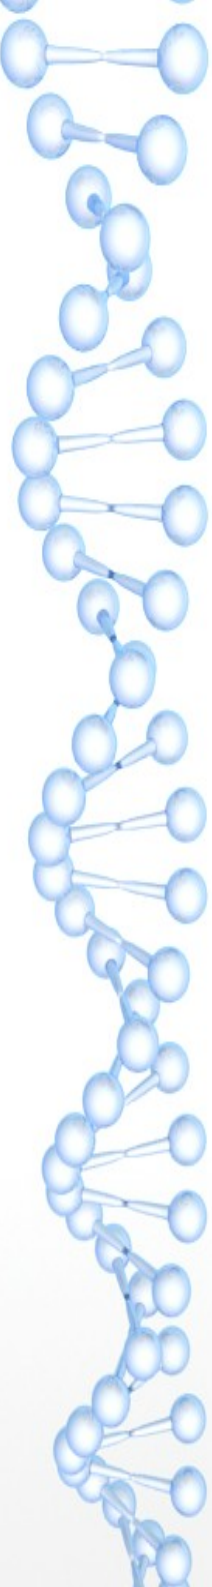

- Discuss definitions and pros and cons of different models
- Prepare a presentation in which you share your preferred model or combination of models with reasons

# Deliverables

- Participation in multiple exchanges on the cohort Discussion Forum and in the VC
- A presentation that summarizes training models and suggests one or a combination of two models as preferred approaches for promoting cultural intelligence in a school and larger learning community (*see notes for clarification*)

# Notes

- 
- We can engage in the discussion for the purposes of understanding content. You do not need to use discussion time to prove you've read the material.
  - The presentation can focus on why you chose the model(s) you did. You can give a brief overview of other models, but the focus is on your selected form of training.
