

U4A3 - Action Plan for Cultural Intelligence Training

Performance Outcome

Candidates develop a year-long action plan for implementing cultural competence and required training in their school

Scope

Create an action plan that covers a school year and includes the following components for enhancing the potential for cultural competence to be developed and sustained in the school:

- workshops for staff, students and/or parents
- policy development
- community and school activities
- curriculum development or changes

Deliverables

- Your action plan!

Notes

- Take at least 30 minutes or so during this unit to search on what other schools are doing
- This should be in presentation format – easy to read and browse
- This may seem similar to the earlier activities addressing transitions in U3, but note that CI training is more academic and less touchy-feely than the get-to-know-you activities of U3.
